PVC Door Styles:

Doors can be made with midrails, transoms, or mullions giving multiple options. See *PVC Door Styles* sheet for most common designs. All doors can be coupled with side screens or fanlights to suit.

Decorative panels:

There are numerous options for decorative panels. These are double reinforced for added strength. See *Renaissance Collection* brochure for more details.

Glass:

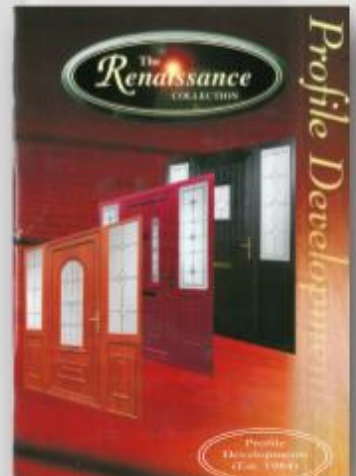

28mm argon filled toughened glass units are fitted as standard using the very latest in glass coating technology to ensure excellent energy efficiency.

As well as our standard range of traditional obscured, tinted, Georgian Bar or leaded glass, we can supply an extensive range of decorative glass using bevelled, coloured, fused or leaded designs. See *SGO—House of Glass* brochure for more details.

Colours:

Our range of colours has expanded significantly over the last few years, with the most common colours being: White, Rosewood, Golden Oak, Anthracite Grey or Black.

Please feel free to call in to our showroom to see a selection of what we can offer.

French Doors:

For optimum weather protection, we only fabricate outward opening French Doors. These offer an unrestricted opening to the outside and are a popular addition to homes. The maximum size is 1800mm wide by 2200mm high, but sidescreens or fanlights can be coupled as per regular PVC doors.

We fit two pairs of 316 Marine Grade door handles with door cylinders keyed alike. The same range of colour finishes and decorative glass are available, with either standard PVC threshold or Low Threshold.

We aim to produce a highly attractive and durable door that is custom made to withstand the severe coastal climate of the Western Isles.

Central to this are partnerships throughout Europe with suppliers of premium quality components.

10 point locking system, as opposed to industry standard 6 point locking. We have 2 hooks for added security with top and bottom roller keepers for optimum compression of gasket seal.

316 Marine Grade Stainless Steel handles and letterboxes for the ultimate corrosion resistance.

Nessglaze Ltd fit **4 hinges per door** as opposed to the industry standard of 3 hinges. Stainless steel hinge pins with high grade zinc die cast body.

Drip bars fitted on all doors.

Industry leading Stormguard low threshold for wheelchair access.
